Vertiv™ Geist™ Temperature Sensor

Quick Installation Guide

Part Number:

SRT-12, SRT-20, SRT50, and SRT-100

Description

The SRT sensor probe is used to monitor temperature in critical environments.

NOTE: *The SRT sensor and cable assembly can span a total cable distance up to 600 ft from the Geist™ environmental monitoring device. There is one sensor with several standard cable lengths. The standard temperature probe measures 1.25 inches (3.18cm) in length.*
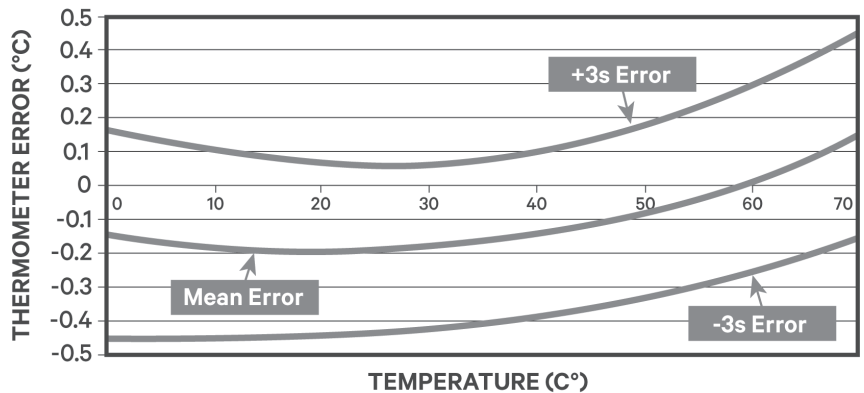

Geist™ Temperature Sensors

Installation

1. Mount the temperature sensor anywhere in the data center with zip ties or Velcro tape.
2. Plug the uplink cable into the sensor port (RJ12/ⓔ) of the Geist™ environmental monitoring device or rack PDU.

Once connected, the Geist™ environmental monitoring device automatically detects and identifies the sensor.
